Subject: Re: How to write Macros with newest trunk code Posted by Florian Uhlig on Fri, 15 Sep 2017 10:59:53 GMT View Forum Message <> Reply to Message

Hi Tobias,

I think your statement is not 100% correct. We had a discussion with the ROOT developers since we think that the problem is due to ROOT. Their opinion is that the problem is inside our geometries. Up to now we have not been able to prove that the problem is not our geometry.

To overcome the problem on can do the following steps at the end of the macro

gGeoManager->GetListOfVolumes()->Delete(); gGeoManager->GetListOfShapes()->Delete(); delete gGeoManager;

Ciao

Florian
