Subject: Re: SDS digitization - new offset functionality
Posted by Tobias Stockmanns on Wed, 08 Nov 2017 09:35:19 GMT

Hi Stefan,

in the MVD we introduced the inactive part by a dedicated silicon layer around the active part. I have nothing against your idea to introduce two additionl parameters to define the offset in x- and y-direction but make sure that the default of these parameters is set to 0.

Cheers,

Tobias
