Hallo Alexander,

You could switch most of the graphics by using following configuration:

MyConfig.txt:

```
compiler= "Your compiler"
debug=yes
optimize=yes
geant4_download_install_data_automatic=no
geant4_install_data_from_dir=yes
build_root6=yes
build_python=no
install_sim=yes
SIMPATH_INSTALL="Your path"
build_for_grid=yes
```

Pease adapt to your case and run:

./configure MyConfig.txt

Best,

Mohammad
