Hello Karoly,

p+p+ --> p+p+pi0 sounds like a job for EvtGen.
You could create a virtual ppsystem in your evt.pdl (similar to pbarpsystem) and use such a decay file:

```
decay ppsystem  
1.0 p+ p+ pi0 PHSP  
end decay
```

PHSP is the generic pahsespace model.

Kind regards.
Ralf
