Dear Iman,

until we solved this version problem, I'd suggest to try the combination

```
SIMPATH    = /cvmfs/fairroot.gsi.de/fairsoft/may16_root6  
FAIRROOTPATH = /cvmfs/fairroot.gsi.de/fairroot/v-16.06b_fairsoft-may16_root6
```

which works for me on kronos. Just to be on the save side, I'd remove the build folder and create it from scratch after setting the variables.

Best regards,
Klaus
