Subject: STTHit timestamps
Posted by JennyTaylor on Tue, 17 Apr 2018 09:28:46 GMT

I am working on a time clustering in the SttCellTrackFinder using Stt hits. For this I am using the STTHit time stamp and I am wondering what exactly the hit time stamp is, for example if it is the start or end of the signal. This information would be very helpful for the further development.

Best,
Jenny
