Dear colleagues,

I have problems with PandaRoot installation. I have installed Fairsoft version may18, FairRoot version 17.10 (17.10b wasn't found) and tried PandaRoot version dec17 (dec17p2 wasn't found during svn copying). During the compilation with make -j4 I've got the errors:

```
....
-- Installing: /home/anna/WORK/PandaRoot/fairsoft_may18/pandaroot_dec17/buildPanda/lib/
cmake/Vc/OptimizeForArchitecture.cmake
-- Installing: /home/anna/WORK/PandaRoot/fairsoft_may18/pandaroot_dec17/buildPanda/lib/
cmake/Vc/FindVc.cmake
[ 37%] Completed 'vc'
[ 37%] Built target vc
Makefile:140: runtime error prescription for the purpose «all»
make: *** [all] Error 2
```

What could be the reason?

Thank you in advance,
Anna
