Dear colleagues,

I have problems with PandaRoot installation. I have installed Fairsoft version may18, FairRoot version 17.10 (17.10b wasn't found) and tried PandaRoot version dec17 (dec17p2 wasn't found during svn copying). During the compilation with `make -j4` I've got the errors:

```
....  
-- Installing: /home/anna/WORK/PandaRoot/fairsoft_may18/pandaroot_dec17/buildPanda/lib/  
cmake/Vc/OptimizeForArchitecture.cmake  
-- Installing: /home/anna/WORK/PandaRoot/fairsoft_may18/pandaroot_dec17/buildPanda/lib/  
cmake/Vc/FindVc.cmake  
[ 37%] Completed 'vc'  
[ 37%] Built target vc  
Makefile:140: runtime error prescription for the purpose «all»  
make: *** [all] Error 2
```

What could be the reason?

Thank you in advance,
Anna
