Subject: Error in PandaRootdec17 installation

Dear colleagues,

I have problems with PandaRoot installation. I have installed Fairsoft version may18, FairRoot
version 17.10 (17.10b wasn't found)
and tried PandaRoot version dec17 (dec17p2 wasn't found during svn copying). During the
compilation with make -j4 I've got the
errors:

....
-- Installing: /home/anna/WORK/PandaRoot/fairsoft_may18/pandaroot_dec17/buildPanda/lib/
cmake/Vc/OptimizeForArchitecture.cmake
-- Installing: /home/anna/WORK/PandaRoot/fairsoft_may18/pandaroot_dec17/buildPanda/lib/
cmake/Vc/FindVc.cmake
[37%] Completed 'vc'
[37%] Built target vc
Makefile:140: runtime error prescription for the purpose «all»
make: *** [all] Error 2

What could be the reason?

Thank you in advance,
Anna
