Subject: Re: FairRoot installation error Posted by C. A. Douma on Tue, 16 Oct 2018 13:06:06 GMT View Forum Message <> Reply to Message

Dear Mr. Kresan,

I had in my .bashrc first:

export PATH=\$PATH:\$SIMPATH/bin/ export LD_LIBRARY_PATH=\$LD_LIBRARY_PATH:\$SIMPATH/lib/:\$SIMPATH/lib/root/

which I now changed to:

export PATH=\$SIMPATH/bin/:\$PATH export LD_LIBRARY_PATH=\$SIMPATH/lib/:\$SIMPATH/lib/root/:\$LD_LIBRARY_PATH

It turned out that 'which cmake' points to the first cmake that is found in PATH. After flipping the order, 'which cmake' pointed to the FairSoft Build:

christiaan@christiaan-Z230:~\$ which cmake /home/christiaan/Desktop/FAIR/FairSoft_Build//bin//cmake christiaan@christiaan-Z230:~\$ cmake --version cmake version 3.11.1 CMake suite maintained and supported by Kitware (kitware.com/cmake). christiaan@christiaan-Z230:~\$

Afterwards, I had no problems installing the lastest dev-branches of FairSoft, FairRoot and R3BRoot.

So thank you very much for your help.

Christiaan.
