I have reinstalled FairRoot to version 18.0.4. Made "make install". The libraries seems to be on their place:

```
anna:~/WORK/PandaRoot/fairsoft_may18/installFairRoot-v18.0.4$ ls  
bin include lib share
```

But again I have:

```
anna:~/WORK/PandaRoot/fairsoft_may18/pandaroot_dec18/buildPanda$ cmake ../  
-- NOT Found FAIRBASE
```

CMake Warning at CMakeLists.txt:73 (find_package):

By not providing "FindFairRoot.cmake" in CMAKE_MODULE_PATH this project has asked CMake to find a package configuration file provided by "FairRoot", but CMake did not find one.

Could not find a package configuration file provided by "FairRoot" with any of the following names:

- FairRootConfig.cmake
- fairroot-config.cmake

Add the installation prefix of "FairRoot" to CMAKE_PREFIX_PATH or set "FairRoot_DIR" to a directory containing one of the above files. If "FairRoot" provides a separate development package or SDK, be sure it has been installed.

Set BuildType DEBUG

CMake Error at CMakeLists.txt:92 (Check_Compiler):

Unknown CMake command "Check_Compiler".

-- Configuring incomplete, errors occurred!

See also " /home/anna/WORK/PandaRoot/fairsoft_may18/pandaroot_dec18/buildPanda/CMakeFiles/CMakeOutput.log ".

????? May be I must put the path to CMake somehow manually in .bash_profile?
