Is it an accident that you installed FairRoot into:

/home/anna/WORK/PandaRoot/fairsoft_may18/installFairRoot-v18.0.4/

while your FAIRROOTPATH is set to:

/home/anna/WORK/PandaRoot/fairsoft_may18/installFairRoot-18.0.4/

which is different in lacking 'v'?

Can you do:

export

FAIRROOTPATH=/home/anna/WORK/PandaRoot/fairsoft_may18/installFairRoot-v18.0.4/

and try again?
