Yes, I did:

```
~/WORK/PandaRoot/fairsoft_may18/pandaroot_dec18/buildPanda$ ./config.sh
```

```
System during compilation: Ubuntu 17.10
```

```
                x86_64
```

```
System now      : Ubuntu 17.10
```

```
                x86_64
```

Do I need to do it everytime?

My ROOTSYS is set to /home/anna/WORK/PandaRoot/fairsoft\_may18/tools/root

Cheers,

Anna
