Subject: Re: Error in PandaRoot_18p1 installation Posted by Peiyong Jiang on Tue, 26 Feb 2019 16:25:51 GMT View Forum Message <> Reply to Message

The problem was solved under the help of Tobias.

I just remove cuda to let the pandaroot not find the cuda and gpu. I did it before but I was failed. The right steps are : 1. remove cuda. 2. remove buildPanda folder and mkdir buildPanda then cd buildPanda 3. cmake ../ 4. make (I did try "make -j4".) The reason I was failed before was that I did not do item 2.

Thanks to Tobias.
