Dear Anna,

Seems like there is a problem with some automatically generated class streamer. I believe we don't want that streamer to do anything, so we could try and force it off. For that, please add in PndPythia6Direct.h in the block after line 47 behind each member declaration a comment followed by an exclamation mark: "//!"

This should tell Root not to use those members in a streamer.

I hope this helps. If it does, please report or create a merge request.

Cheers!

Ralf
