Just an update:

After trying numerous combination of software, the only one that worked for me on Cent OS7 was:

```
fairsoft_nov20_patches
FairRoot-v18.6
PandaRoot v12.0.2
```

However, the event generator/simulation software does not seem to be working. See sample output below. (Complete output is enclosed.)

Still, I was able to copy simulation *.root files from a computer with an older version of the software and the analysis code seems to be working.

```
-----
[mlattery@localhost rho]$ root -l -b -q 'tut_sim.C(100)'
```

```
Processing tut_sim.C(100)...
