Good afternoon,

I'm trying to install FairSoft apr21p1 on my Mac with Mac OS Big Sur 11.6.2.

I used the installation from source procedure described here:

<https://github.com/FairRootGroup/FairSoft/blob/nov20/legacy/README.md> .

I put below the error in the installation of FairSoft.

Is Mac OS 11.6 supported by FairSoft?

There is a way to install R3BRoot on this operating system?

Thanks in advance for the help?

Cordially,

Andrea Lagni
