Subject: Defaults in User Registration Form

Currently the user registration forms has a by default the options "Select Notification By Default" and "Private Message Notification" disabled, so a user to be sees a form like

I'd guess, that in our community, where most persons used to work with mailing lists, by far most would like to have both features enabled. So it seems best, at least in my view, to have them enable by default inb the registration process.

Questions:
Are these registration defaults configurable ?
If yes, wouldn't it be best to set them to "yes" ?
