the theses can be found in
 http://www.e18.physik.tu-muenchen.de/research/publications/compass/Data_
Acquisition_and_Fast_Signal_Processing_for_a_new_Positron_Emission_Tomog raph.pdf

1. the TCS controller sends RESET every 14 seconds. This time interval came from SPS duty cycle.
2. there are different implementations of the counter. In current version it has 30 bits.
