---

Dear all,

We have started a new discussion and news forum dedicated for PandaRoot-related topics by making use of the FUDforum system at GSI. This forum should replace the PandaRoot discussions on the HyperNews system. It can be accessed via the following link:

<http://forum.gsi.de>

(followed by --> Panda -> PandaRoot)

The advantages with respect to the HyperNews forum is that - within the new forum - messages can be searched through and files can be attached to the topics. This has motivated us to discuss a switch in forum during the last PandaRoot computing workshop, which was accepted by all participants.

I ask those who are using/developing PandaRoot or those who like to be kept informed, to start using the new PandaRoot forum site immediately. Registration can be done online.

Kind wishes,

Johan Messchendorp.
