Subject: PandaROOT Wiki update

Posted by Sebastian Neubert on Tue, 15 May 2007 21:26:47 GMT

Hi!

There is a new howto: Howto write a test-bench that can be used in teractively in CINT.

I have cleaned up the PandaROOT Wiki section a little bit. I found it to cluttered and I tried to make it more comprehensible. No big changes made. Just replaced headings by a bullet-list.

Cheers! Sebastian.
