Dear all,

we will have a PandaRoot VRVS meeting
next Wednesday, 23.05.2007, 14:00-16:00.

room: Saturn
pass: segFault

(room open for audio testing from 13:30).

We would dedicate almost the whole meeting to EMC,
in particular:

- o digitization
- o clustering
- o geometry
- o Geant3 vs. Geant4 -
- o are there some real data to check with ?
- etc. etc.

Many of the EMC experts (e.g. Dima, Jan Zhong, Martin Kotulla,
Thierry Mertens, Aleksandra Biegun, ..., hopefully Aleksandra Wronska t.b.c.) will try to
participate, so we might have
some interesting and detailed discussions.

There will be one more agenda item (besides EMC):
open discussion about "development versions" in subversion.
i.e. shall checked-in code be compilable ?
how do we declare stable versions ?
etc. etc.

Hope to see you on Wednesday.

Johan and Soeren
