Hi Ralf,

for sure it is possible to implement this into the MVD classes. I am a bit worried, that you want to remove the TST classes, because I am using them at the moment to further develop my digitization and reconstruction code.

At a certain point we have to merge both developments and I would like to plan this together with you. Thus I would like to arrange a MVD software meeting. One occasion would be the general MVD meeting beginning of June. After this the next possibility for me is from the beginning of August.

Cheers,

Tobias
