Subject: Re: decay off in geant4
Posted by StefanoSpataro on Fri, 25 May 2007 08:36:09 GMT

This part belongs to our developement, not to the "global" virtualMC.

If I remember well Mohammad developed these functions, that are geant3 functions, not geant4! This means that there can be something which is not yet fully debugged.

In each case we know for sure that the geant4 lists are not so "tuned" (they are the ones of example4, if I remember well), so do not expect to have good results with g4 at the moment.
