Hello,
the cmake was installed here in the Gießen cluster

```
cmake --version -> cmake version 2.4-patch 3
```

so I started to test it here. First I set the SIMPATH:

```
export SIMPATH=/d/c0/cbmsoft/ccacbmsoft
```

I crated a cbuild directory, I moved there, and I type:

```
spataro@cca04 /home/spataro/cbuild $ cmake ../pandaroot/
-- This is an 32 bit machine
-- You're not using the GSI installation of the external packages.
-- If any problems occur this can be due to the fact that the macros
-- were mostly tested at GSI. If you find any problems please contact
-- f.uhlig@gsi.de
-- Found root of the simulation software at /d/c0/cbmsoft/ccacbmsoft
-- Found ROOT version "5.14/00" at "/d/c0/cbmsoft/ccacbmsoft/tools/root"
-- Found GEANT3: /d/c0/cbmsoft/ccacbmsoft/transport/geant3/lib/tgt_linux/libgeant321.so
-- Found PLUTO: /d/c0/cbmsoft/ccacbmsoft/generators/lib
-- Found Generators: /d/c0/cbmsoft/ccacbmsoft/generators/lib
-- Found GEANT4: /d/c0/cbmsoft/ccacbmsoft/transport/geant4/lib/Linux-g++
-- Found GEANT4VMC: /d/c0/cbmsoft/ccacbmsoft/transport/geant4_vmc/lib/tgt_linux
-- Found CLHEP: /d/c0/cbmsoft/ccacbmsoft/cern/clhep/lib
-- Configuring done
-- Generating done
-- Build files have been written to: /home/spataro/cbuild
```

It seems everything fine. Then I launch the config.sh script:

```
spataro@cca04 /home/spataro/cbuild $ . ./config.sh
-bash: GEANT4_DIR-NOTFOUND/env.sh: No such file or directory
```

What is going wrong?
