Hi Ralf,
 you' re right, I did not think about that (sorry!).

Anyway, I just added the CMakeList.txt file on the svn, but I have a question: I guess I have to add the stt directory also to the general CMakeList.txt, is this correct (I don' t know cmake, so it' s better if I ask first)? If yes, can I modify this file or do I not have the right permissions?
                Ciao,
                 Lia.
