---

AliRoot v4-04-Rev-14 and v4-05-Rev-04 have been installed at GSI.  
For details please see:  
<http://www-linux.gsi.de/~kschwarz/aliroot.html>

a new directory structure has been introduced to consider 32 and 64bit versions on Debian Sarge and Debian Etch.  
All AliRoot versions compiled against Debian Etch 64bit Root 5.15.08 can be used for PROOF at GSIAF.

Cheers,

Kilian
