Dear all,

we will have a PandaRoot EVO meeting
this Wednesday, July 11, 2007, 14:00-16:00.
(audio testing from 13:30).

Agenda:

1.) Coding Conventions - discussion and decision.

for preparation of the meeting, please take a look at the links
from the following Wiki page:

http://panda-wiki.gsi.de/cgi-bin/view/Computing/PandaRootCodingRules

in particular:

-> Panda/Babar-like Framework Coding Conventions

so we can go through the rules and decide,
which one we apply and which one we don't apply.

2.) shall we declare rev. 1079 as the first "stable" version?

(to have a version which definitely compiles,
until all packages are checked in detail).

3.) A.O.B. (any important issues) ?
