I have the feeling that even the KVI nightly has the same problem.

If I check the Dashboard I can find kvip81.-kvi.-nl together with opteron.-cluster.-rug.-nl and my cca03.-physik.-uni-giessen.-de with the tag of 19.07.07 06:00, while the mine has run this night at 2 and the dutch ones... well they were not there yesterday, so probably even they has run this night and not yesterday.
