Subject: update in emc code Posted by Dima Melnychuk on Sun, 22 Jul 2007 14:36:27 GMT View Forum Message <> Reply to Message

Hi all,

I made some updates in emc reconstruction code.

The main modification is that geometry for reconstruction is not read from the .dat file but read from simulation file and accessed via TGeoManager. Emc macros are updated to take into account these changes.

Dima
