Hi Tobias

> By the way is there a reason not to update to Geant4.9.0 but  
> to take 8.3?

The reason is that updating to version 9.0 is only possible when updating also geant4vmc and root.

The real problem is that the new root version has several changes of the interface which breaks backward compatibility of our framework. So we need some more time for tests and discussions before we can do this step.

Ciao

Florian
