Hi Andrei,

but v01_00_00 has the identical g4
(i.e. external packages from 10. Jan 2007).

and g4+emc is tested O.K.

so it must be a detector.
what is crashing? the run_sim1.C? If yes, can you say in which detector the segmentaton fault occurs?
(or even better, maybe run the Dart.sh in the crashing version, so that we can see the crash in the dashboard?)

v01_00_00 is rev 1079.
some detector changes (stt1, stt2 vs. stt; tst vs. mvd)
were made in later revisions.

Soeren
