---

Dear all,  
I have already created a new directory at  
/d/panda02/asanchez/XiminXibar which contains  
the input files for the hyp detector, i.e,

xi minus production in a nuclear target(Carbon)  
and xibar annihilitaion products inside the nuclear target(Carbon).

I have modified the original format of these dat files in order to be readed by the  
CbmAsciiGenerator.

The source code of these files is a event generator created by the  
Torino Politecnico Group.

The code will be in a near future implemented inside pgenerators.

Best regrads  
ALicia S.
