Subject: ProcessHits() "not visible" while reading root geometry file
Posted by Aleksandra Biegun on Wed, 10 Oct 2007 09:53:41 GMT

Hello,

when I want to read a root file with emc geometry,
program does not go into the ProcessHits() function
(PndEmc.cxx) which uses TVirualMC.cxx
and that's why I can not get Points for this detector
(the geometry of this detector is plotted correctly).

Does anybody know why?

Thanks in advance!

Ola.
