Subject: Custom vs. commodity networks
Posted by Patrick R. Haspel on Mon, 24 May 2004 14:31:56 GMT

Dear collegues,

I would like to hear your thoughts about the suitability of these 2 classes for the FutureDAQ networks.
We could start with advantages/disadvantages of the two classes and afterwards rank them with respect to the use in this project.

Tell me your thoughts and concerns...

Thanks for all participation,

Patrick
