Hallo Johan,

vmc 2.4 is still not released (no tar file) but you can get it from SVN,

svn co https://root.cern.ch/svn/geant4_vmc/trunk geant4_vmc

if you replace your vmc2.3 with this one, you will need also to modify the gconfig/g4Config.C file and the directory pandaroot/cbmg4 too. and the changes are not backward compatible with the vmc 2.3!

So should we switch to the new one? now or only for release 2 what do you think?

regards

Mohammad
