Hallo,

Quote:With the new external packages, the Geant3 running mode should be as fine as with the older external packages, however, including the Geane updates (correct me if I am wrong Mohammad).

This is true.

I would suggest to prepare a small script that replace the g4_vmc in the already installed new external packages by all of you, also to delever a new g4Config.C which fit to the new VMC and continue tesing with this.

 Furthermore, the installation has caused some headaches
 for some of us (I am really feeling sorry for Stefano), than what we expected a priori.

This has reasons that are not really related to the new packges!

Mohammad
