Hi,

I have found this error in TPC trying to compile (that according to the dashboard is present since two days):

```
[ 44%] Building CXX object tpc/CMakeFiles/tpc.dir/TpcClusterCOG.o
/home/spataro/pandaroot/tpc/TpcClusterCOG.h:41: error: extra qualification 'TpcClusterCOG::'
on member 'cog'
make[2]: *** [tpc/CMakeFiles/tpc.dir/TpcClusterCOG.o] Error 1
make[1]: *** [tpc/CMakeFiles/tpc.dir/all] Error 2
```

Does somebody know what it means?
