Dear all,

From the discussion in our last PandaRoot video-conference meeting, it became clear that the Giessen group will have serious problems (teaching duties) to participate in the workshop in case we schedule the meeting in February. Since I find it important that the Giessen experts are present, I would like to schedule the meeting in January in stead. Now, based on the "remaining" poll result, I propose for the dates of the meeting:

21-25th of January 2008, location KVI, Groningen.

I will try to reserve a whole week for the workshop (lets see how the program will look eventually).

In one of these days, I will announce the workshop as well on the general Panda mailing list and provide a website for registration and for further information (program, traveling, hotel reservation, etc.).

Kind wishes,

Johan.
