Hallo,

I am not really sure how such an event will help us at this
early stage in PANDA? The problem is that we are using the VMC
with Geant4 and not the native Geant4, So these people will
speak about the native Geant4 and make some tutorials which
will not really help us. They will tell us about the nice
different models which they have but they will never be able to
tell us if these models are really useful for us, this we have
to validate ourselves (with and without VMC, see for example:
http://indico.cern.ch/conferenceDisplay.py?confId=21884 ,or
the attached ppt) The fact that we use VMC which introduce a
different navigation to Geant4 makes such workshops (my
personal opinion) somehow useless for us.
