Hi,

This is the same problem which Tobias was facing weeks ago, it is related to importing root geometry from the file (using CadtoROOT) I solved this but only for the MVD, So please take a look to the MVD code (ConstructRootGeomtry) and change your code. This is just for now the next step will be done as soon as possible, namely to put this method in the base class (CbmDetector) so that you do not have to impliment it your self.

regards

Mohammad
