Dear Geant4 users,

due to the still existing lack of disk space in the user space and since Debian Woody is not heavily in use anymore at GSI I would like to remove one more old G4 version, if possible.

I suggest to remove:

geant4.6.0 for Debian3.0 (Woody) and compiler gcc295-04

located at: /u/gsisim/simulation

In case nobody complains up to 1 week from now this installation will be removed.

Cheers,

Kilian
