Subject: Re: cbmg4 error
Posted by asanchez on Fri, 16 Nov 2007 08:33:17 GMT

Hi Tobias,
at /pandaroot/cbmg4/CbmRunConfiguration.cxx
i commented the line #include "TG4ModularPhysicsList.h"
But also Stephano told me, that cbmg4 is not used
any more, so we can comment the line

if(GEANT4_FOUND AND GEANT4VMC_FOUND AND CLHEP_FOUND)
  add_subdirectory (cbmg4)
endif(GEANT4_FOUND AND GEANT4VMC_FOUND AND CLHEP_FOUND)

in the Cmakelist.txt
in /pandaroot

so that is the situation.
best regards.

ALicia.
