I fill them in the Exec method with

```
TClonesArray &tracks = *fCandidates;
...
Int_t size = tracks.GetEntriesFast();
....
TParticle *p=new (tracks[size])
TParticle(ft->pdt(),0,0,0,0,ft->p4(),TLorentzVector(ft->startVtx(),t- >T()));
```

I think I copied this structure from some other module. Is there a better way?

Klaus
