FYI

Dear colleagues,

as announced earlier, we will have regular joint CBM-PANDA software meetings approximately once per month. The aim is to discuss FAIRROOT related issues relevant for both experiments. The meetings will happen once per month. For CBM, this meeting replaces then the weekly CBM-internal software meeting.

The first meeting of this series will take place tomorrow, December 20, at 10 am via EVO:

Meeting: CBM-SOFT

Community: CBM

Password: cbmroot

Open: 9:30 - 12:30

This first meeting will be devoted to the discussion of the event display. We will show our developments in QT4 (Andrey) and ROOT (Evgeny, to be shown by me). Mohammad will report on the newest developments in ROOT.

You are welcome to join the meeting. At GSI, we meet in the videoconferencing room 4.161.

With best regards,

Volker Friese
