Hi Tobias!

Since this trackfinder is one major part of my thesis I want to be involved!
I would be happy to put it onto more general feet together with you! Let's do it together - what do you think?

I will put some safety switches into the code with the MVD and submit it. Then you can have a look and we can discuss the code.

There is much room for improvement still! Next thing I wanted to tackle was error treatment, which I omitted for the time being. But also the general structure is a bit cumbersome at some points. I would be happy to discuss this!!!

Cheers! Sebastian.
