Subject: Add folder to cmake

Dear developers,

I would like to add a new folder (PndTools/riemannfit) to the cmake process of pandaRoot. Therefore I added add_subdirectory(PndTools/reimannfit) to the main CMakeLists.txt and my own CMakeLists.txt file in PndTools/riemannfit. But after calling cmake ../pandaroot in the build folder, no makefile for riemannfit is created.

Is there something else I have to add to the CMakeFiles?

Thank's in advance.

Tobias
