Hi,

I have just successfully installed geant4.9.0. Then i tried to run example 1 from novice example (A01). I did every thing as instruction and ok. Finally, i typed "make", it shew an error at the end:

```
..  
Compiling A01PrimaryGeneratorMessenger.cc ...  
Compiling A01Trajectory.cc ...  
Creating/replacing object files in  
/home/xle/GEANT4/g4work/tmp/Linux-g++/A01app/libA01app.a ...  
ar: creating /home/xle/GEANT4/g4work/tmp/Linux-g++/A01app/libA01app.a  
Compiling A01app.cc ...  
Using granular libraries ...  
Linking A01app ...  
/usr/bin/ld: cannot find -lXmu  
collect2: ld returned 1 exit status  
make: *** [/home/xle/GEANT4/g4work/bin/Linux-g++/A01app] Error 1
```

Could somebody solve this problem?

Thanks a lot,
Chungxl.
