Subject: geant4 compilation Posted by Xuan Chung Le on Wed, 30 Jan 2008 16:46:00 GMT View Forum Message <> Reply to Message

Hi,

I have just successfully installed geant4.9.0. Then i tried to run example 1 from novice example (A01). I did every thing as instruction and ok. Finally, i typed "make", it shew an error at the end:

.. Compiling A01PrimaryGeneratorMessenger.cc ... Compiling A01Trajectory.cc ... Creating/replacing object files in /home/xle/GEANT4/g4work/tmp/Linux-g++/A01app/libA01app.a ... ar: creating /home/xle/GEANT4/g4work/tmp/Linux-g++/A01app/libA01app.a Compiling A01app.cc ... Using granular libraries ... Linking A01app ... /usr/bin/ld: cannot find -IXmu collect2: ld returned 1 exit status make: *** [/home/xle/GEANT4/g4work/bin/Linux-g++/A01app] Error 1

Could somebody solve this problem? Thanks a lot, Chungxl.
