
Subject: GEANE with new external packages
Posted by [EDownie](#) on Thu, 31 Jan 2008 16:49:50 GMT

Dear All,

I installed the latest version of the external packages on 11th January, but when I try to install the development version of Pandaroot with libGeane, cmake informs me that I can't compile with libGeane as I have too old a version of Geant 3. The output is copied below.

Any suggestions?

Thanks,

Evie

```
cmake ../pandaroot/

```

WW Can not install libGeane the interface to GEANE.

WW The GEANT3 version you're using is too old and doesn't support the necessary features.

WW Please use a newer GEANT3 version if you want to use libGeane.
